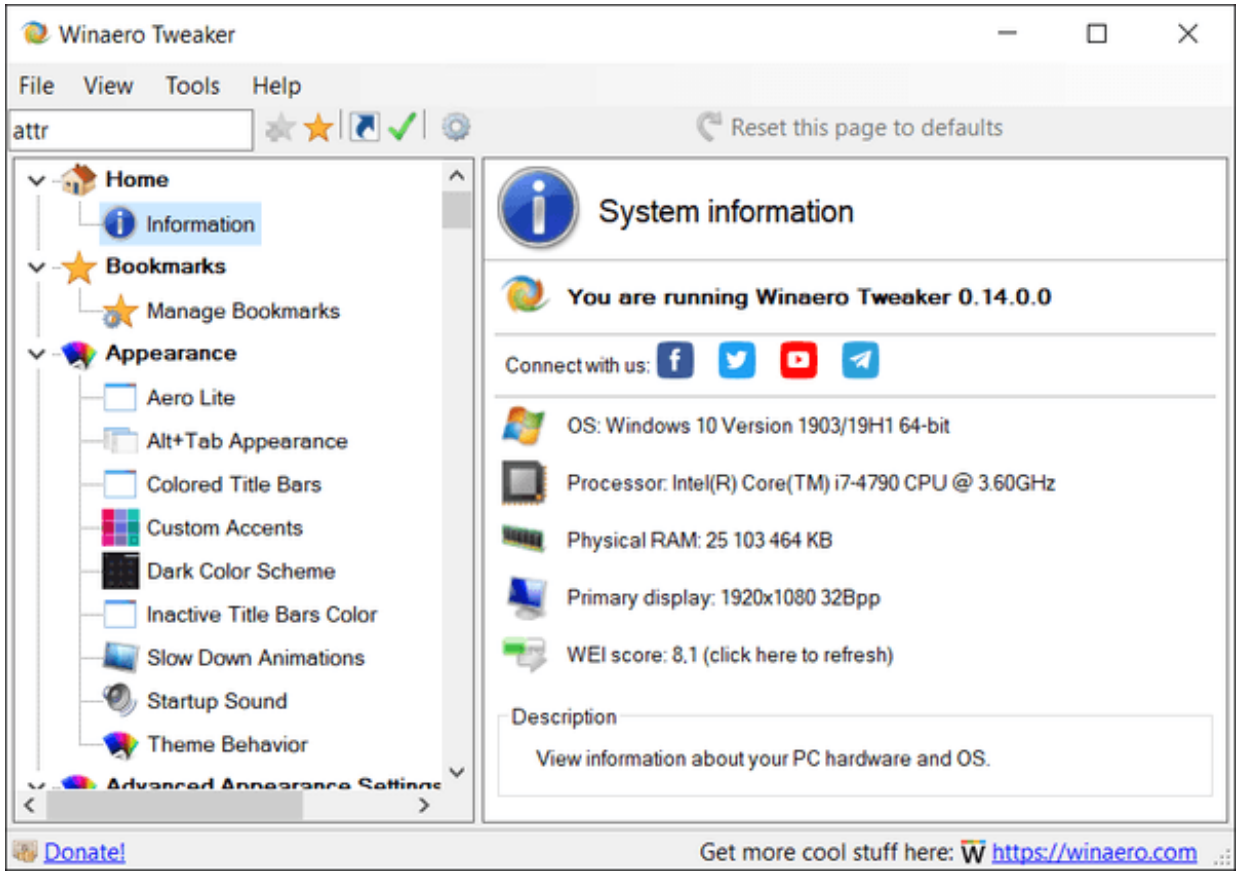
Winaero Tweaker

winaero.com/comment.php

After years of development, I decided to release an all-in-one application which will include most options available in my free Winaero apps and extend it as much as possible. I would like to introduce **Winaero Tweaker** - universal tweaker software which supports Windows 7, Windows 8, Windows 8.1 and Windows 10.



Note: the set of available options will depend on the operating system version you are running.
Version 0.16.1 is released on December 19, 2019.

- updated the installer for Windows 7 which was trying to extract files created for Windows 8.

0.6 [Release notes and screenshots]

0.5.0.6 [Release notes and screenshots]

0.5.0.5 [Release notes and screenshots]

0.5.0.4
Fixed the Taskbar Transparency Level checkbox state.
Added a sign out request to Taskbar Transparency Level and Disable Quick Action Buttons.

0.5.0.3 [Release notes and screenshots]

0.5.0.1 [Release notes and screenshots]

0.5 [Release notes and screenshots]

0.4.0.3 [Release notes and screenshots]

0.4.0.2
[Release notes and screenshots]
0.4.0.1
Fixed a crash when the user has OneDrive uninstalled.
Fixed wrong Libraries visibility detection under Windows 10/8.

0.4 [Release notes and screenshots]

0.3.2.2 [Release notes and screenshots]

0.3.2.1 [Release notes and screenshots]

0.3.2 [Release notes and screenshots]

0.3.1.1 [Release notes and screenshots]
Fixed a minor bug in window borders.

0.3.1 [Release notes and screenshots]

- The Colored title bars feature now comes with auto colorization enabled by default.
- Added Advanced appearance->Menus. There you can change the height and font of menus in Windows 7, Windows 8/8.1 and Windows 10.
- Added Advanced appearance->Title bars. There you can adjust height and font of titlebars and window buttons in Windows 7, Windows 8/8.1 and Windows 10.
- Added Advanced appearance->Scrollbars. There you can adjust width of scrollbars and change the size of scrollbar buttons in Windows 7, Windows 8/8.1 and Windows 10.
- Added Advanced appearance->Icons. There you can adjust the font of icons in Explorer and on Desktop. Also, here you can adjust icon spacing on Desktop in Windows 7, Windows 8/8.1 and Windows 10.

- Added the ability to activate the Aero Lite theme.
- The Window Borders feature is available now in Windows 10. It can be used to tweak borders in Aero Lite and in third-party themes (but not in the default Windows 10 theme which still has no borders!).
- A bug was fixed in Appearance -> Custom accents. The "reset defaults" button was not working. This is fixed, it works now.
- Various improvements to the code.

v0.3.0.2 Fixed the broken "Get colored title bars" feature in Windows 10. It works now.

Description
Here you can change various options of the new Boot manager of Windows 8, Windows 8.1 and Windows 10. All these options are inaccessible from regular Windows settings. The "Disable text messages" option will remove messages like "Updating Registry – 10%". They are useful, so do not disable them unless you know what you are doing.

At this moment, Winaero Tweaker is a portable application and does not require to be installed. I plan to merge my other tools eventually with Winaero Tweaker. Winaero Tweaker is freeware.
